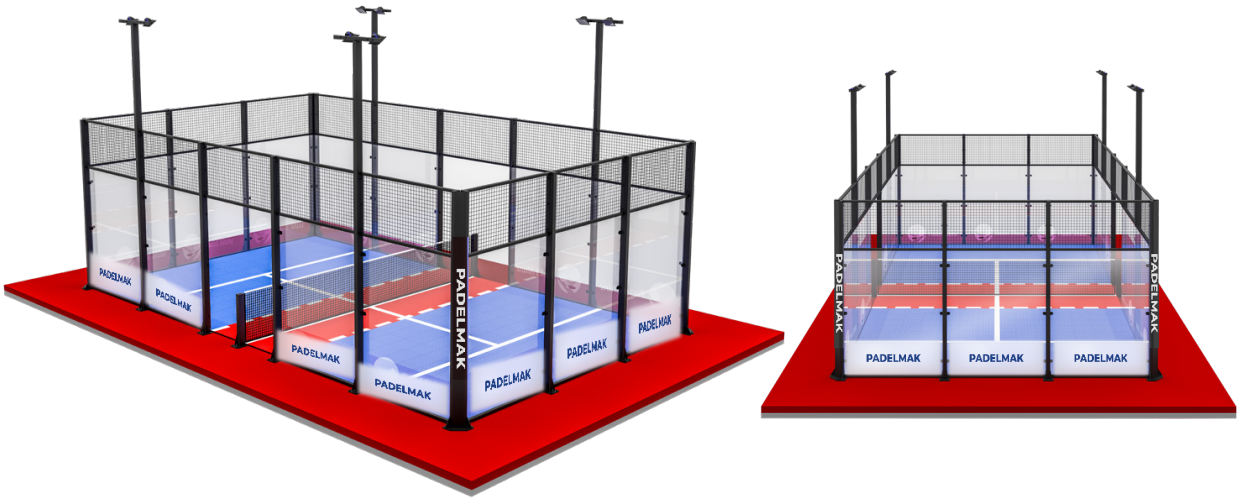
PADBOL

The Fusion of Football and Padel

Dynamic, fast-paced and highly engaging

Padbol is a fast-paced sport that combines elements of football (soccer) and padel. It is played on a smaller, glass-walled court where players use their feet, chest and head to pass, hit and score, and where the ball can be played off the walls as in padel. It suits players of all ages and skill levels.

The PADELMAK Padbol court is built from hot-galvanised steel and tempered glass, with plastic floor tiles, LED lighting and a professional net. Its compact size allows installation in a wide range of venues, for professional competition or casual play.



PADELMAK Padbol court: perspective view and front view.

GAME CONCEPT AND KEY FEATURES

Compact court design

Played on a court smaller than a traditional football or padel court, which suits small spaces and quick matches.

Foot-based gameplay

Players use their feet, chest and head to pass the ball and make plays, combining football technique with the enclosed space of padel.

Glass wall rebounds

As in padel, the ball can be played off the glass walls, adding a strategic and dynamic element to the game.

Team play

Played in teams of two, which encourages communication, strategy and teamwork.

INTENDED USE

Venues	Sports clubs, gyms and recreational centers	Play	Professional competition and casual play

ABOUT PADELMAK

PADELMAK is an Istanbul-based supplier of padel and padbol court systems. We deliver complete court solutions, from the steel structure and tempered glass to flooring, LED lighting and installation, for sports clubs, hotels, residences and recreational facilities.
